Legal and Economic Consulting

K.A.C. Group is not a classic audit and law firm and practices corporate and tax consulting at the intersection of Ukrainian and foreign legislations. Such services are “boutique” in nature, where we accompany clients’ tax projects starting from the level of business structures up to their personal ones, both in Ukraine and abroad.

The long-term work of the lawyers and economists of the group on joint projects allowed us to develop our own products that are in demand among clients:

- Tax consulting with preparation of recommendations in the form of expert opinions
- Accounting outsourcing of Ukrainian and foreign companies
- Voluntary and mandatory audit. Preparation of documentation on transfer pricing
- Tax advocacy. Support of inspections carried out by the State Fiscal Service of Ukraine
- Preparation of tax declarations. Confirmation of sources of income
- Representation of non-residents on the territory of Ukraine with the function of a tax agent
- Reporting on controlled foreign companies

We do not sell work hours, but results-oriented products and solutions!
